Data Query Language

8.

COMMAND

Command Name: Select

Syntax:

1. Select * from table - name;

Select distinct <column-names> from <table-name>;

description:

Query:

Select distinct year from Details.

COMMAND NAME: Order by clause

Syntax:

Select <column-name> from <table-name> Order by <column-name>

description

Example:

Select <name> from <instruction> where dept - name =

physics order by <name>
Select * from Instruction order by salary desc, name asc

Select dept_name, avg(salary) as averageSalary from
Details group by dept_name;

DEPT_NAME	AVERAGE SALARY
ECE	55000
CSE	50000

Select max(salary), min(salary), sum(salary) from
Details group by dept_name having dept_name = 'CSE';

MAX(SALARY)	MIN(SALARY)	SUM(SALARY)
50000	50000	100000

Select id, name, dept_name, salary * 1.5 from details;

ID	NAME	DEPT_NAME	SALARY * 1.5
101	Ramya	CSE	75000
102	Bharath	CSE	75000
103	Dina	ECE	82500

Select name from Details where dept_name = 'CSE'
and salary > 1000;

NAME

Ramya

Bharath

Select name from Details where salary between 45000 and 50001;

NAME

Ramya

Bharath

COMMAND NAME: Group by clause

Syntax:

Select < column-name > from < table-name > group by < column-name >;

Group by :

Sum

Average

Max, Min

Count

Description:

Example:

Select dept-name, avg(salary) as average/salary from
instructor group by dept-name

COMMAND NAME: Having

Syntax:

Select < column-name > from < table-name > where < condition > group
by < condition > having < condition >;

Select ID, name, dept-name, salary * 1.5 from instructor;

Select name from instructor where dept-name = 'Comp. Sci'
and salary > 10,000

Select name from instructor where salary between 90000
and 100000;

Select name, course_id from instructor, teaches where
(instructor.ID, dept-name) = (teaches.ID, 'Biology');

Select course_id from section where semester = 'Fall'
and year = 2017) union (Select course_id from section
where semester = 'Spring' and year = 2018);

Section:					
SI_NO	NAME	DEPT	COURSE	SEMESTER	YEAR
21	Janu	CSE	2024	FIVE	2003
	Thani	CSE	2014	FIVE	2003
	Abhi	CSE	2004	FIVE	2004

(Select course_id from section where semester = 'Five' and year = 2003) union (select course_id from section where semester = 'fall' and year = 2004)

COURSE

2004
2014
2024

UNION ALL :

COURSE

2014

2004

(Select course_id from section where semester = 'Fall'
and year = 2017) union all (select course_id
from section where semester = 'Spring' and year = 2018);

Result:

Thus the SQL command for data query language
was executed successfully.
