UNIT-1

UNIT-1

1.2 The Electronic Commerce Environment

- 1.2.1 The Virtual Corporation
- 1.2.2 The Electronic Marketers
- 1.2.3 The Catalyst of Electronic and Web Commerce
- 1.2.4 Available Communication Apparatus
- 1.2.5 Applications of Electronic/Web Commerce
- 1.2.6 Benefits of Electronic/Web Commerce
- 1.2.7 Elements of a Successful Electronic Marketplace
- 1.2.8 Security Issues and Approaches Related to Web Commerce
- 1.2.9 Size of Electronic Marketplace

- 1.3.1 Electronic Data Interchange
- 1.3.2 On-line Networks and Services
- 1.3.3 The Internet: Web Commerce
- 1.3.4 CD-ROMs and Hybrids
- 1.3.5 Screen Phones
- 1.3.6 Kiosks
- 1.3.7 Interactive Television and Video Dial Tone
- 1.3.8 WebTV
- 1.3.9 Interactive Banking

2.1.1 What Is Electronic Commerce?
2.1.2 Some Open Issues

UNIT-I

2.2 Electronic Data Interchange	64
2.2.1 What Is EDI?	64
2.2.2 EDI's Benefits	67
2.2.3 Status	68
2.2.4 System Approach	70
2.2.5 Communication Approach	71
2.3 Migration to Open EDI	73
2.3.1 Approach	73
2.3.2 Benefits	75
2.3.3 Mechanics	76
2.3.4 Challenges	77
2.3.5 Examples	78
2.4 Electronic Commerce with WWW/Internet	78
2.4.1 Opportunities	81
2.4.2 Internet/Web Statistics	87
2.4.3 Internet and WWW Tools	89
2.5 CommerceNet Advocacy	95
2.6 Web Commerce Going Forward	96
References	99

Chapter 3 Approaches to Safe Electronic Commerce	101
3.1 Overview	101
3.2 Secure Transport Protocols	107
3.2.1 S-HTTP	108
3.2.2 SSL	108
3.2.3 Alternatives	109
3.3 Secure Transactions	110
3.4 Secure Electronic Payment Protocol (SEPP)	112
3.4.1 SEPP Process	112
3.4.2 SEPP Architecture	116
3.5 Secure Electronic Transaction (SET)	118
3.6 Certificates for Authentication	122
3.7 Security on Web Servers and Enterprise Networks	123
3.7.1 Host Security Considerations	124
3.7.2 Enterprise Network Security	133
3.8 Conclusion	141
References	142

Chapter 4 Electronic Cash and Electronic Payment Schemes	145
4.1 Internet Monetary Payment and Security Requirements	146
4.1.1 Confidentiality of Payment Information	146
4.1.2 Payment Information Integrity	148
4.1.3 Account holder and Merchant Authentication	150
4.1.4 Interoperability	150
4.2 Payment and Purchase Order Process	151
4.2.1 Overview	151
4.2.2 Account Holder Registration	151
4.2.3 Merchant Registration	153
4.2.4 Account Holder (Customer) Ordering	153
4.2.5 Payment Authorization	156

UNIT-2

4.3 On-line Electronic Cash	156
4.3.1 Overview	157
4.3.2 Problems with Simple Electronic Cash	157
4.3.3 Creating Electronic Cash Anonymity	159
4.3.4 Preventing Double-Spending	160
4.3.5 E-Cash Interoperability	160
4.3.6 Electronic Payment Schemes	174

Part 2 Security

Chapter 5 Internet/Intranet Security Issues and Solutions	179
---	-----

5.1 The Need for Computer Security	181
5.1.1 Reasons for Information Security	184
5.1.2 Protecting Resources	185
5.1.3 Types of Risks	189
5.2 Specific Intruder Approaches	189
5.2.1 Bulletin Boards	189
5.2.2 Electronic mail	190
5.2.3 File Transfer	190
5.2.4 IP Spoofing	190
5.2.5 Password Guessing	190
5.2.6 Password Sniffing	191
5.2.7 Telnet	191
5.2.8 Viruses	191
5.2.9 SATAN	192
5.3 Security Strategies	192
5.3.1 Policy Issues	195
5.3.2 Mechanisms For Internet Security	202
5.4 Security Tools	202
5.4.1 Secure Transport Stacks	203
5.4.2 Kerberos	206
5.4.3 Secure Transactions over the Internet	206
5.4.4 UNIX Security	207
5.4.5 Password Security Systems	209
5.4.6 Electronic Mail	212
5.4.7 Server Security	212
5.4.8 Trusting Binaries	213
5.5 Encryption	216
5.5.1 Conventional Encryption	217
5.5.2 Public-Key Encryption	219
5.5.3 Application of Encryption	221
5.5.4 Breaking an Encryption Scheme	222
5.5.5 The Data Encryption Standard	223
5.5.6 Commercial Communications Security Endorsement Program	223
5.5.7 Government Security Levels	225
5.5.8 The Clipper Chip	225
5.5.9 Commercial Outlook on Encryption	228
5.6 Enterprise Networking and Access to the Internet	229
5.6.1 Approaches for Enterprise-Level Security	234
5.6.2 Variations and Combinations	236
5.6.3 Design Considerations	

UNIT 3.
5.7 Antivirus Programs

5.7.1 Viruses and Worms

5.7.2 The Nature of Viruses

5.7.3 Countering the Threat of Viruses

5.8 Security Teams

5.8.1 Computer Emergency Response Team (CERT)

5.8.2 Forum of Incident Response and Security Teams (FIRST)

Glossary

UNIT-A
Chapter 6 MasterCard/Visa Secure Electronic Transaction

6.1 Introduction

6.1.1 Background

6.1.2 Objectives

6.2 Business Requirements

6.2.1 Requirements

6.2.2 Features

6.2.3 Scope

6.3 Concepts

6.3.1 Payment System Participants

6.3.2 Cryptography

6.3.3 Certificate Issuance

6.3.4 Kinds of Shopping

6.4 Payment Processing

6.4.1 Overview

6.4.2 Cardholder Registration

6.4.3 Merchant Registration

6.4.4 Purchase Request

6.4.5 Payment Authorization

6.4.6 Payment Capture

6.4.7 Additional Messages

Chapter 7 E-mail and Secure E-mail Technologies for Electronic Commerce

7.1 Introduction

7.2 The Means of Distribution

7.3 A Model for Message Handling

7.3.1 ITU-T Model

7.3.2 Internet Apparatus

7.4 How Does E-mail Work?

7.4.1 UUEncode/UUDecode

7.5 MIME: Multipurpose Internet Mail Extensions

7.5.1 Basic Concepts

7.5.2 MIME Body Parts

7.5.3 MIME Data Encoding Techniques

7.5.4 Address Directory

7.6 S/MIME: Secure Multipurpose Internet Mail Extensions

7.7 MOSS: Message Object Security Services

7.7.1 Purpose

7.7.2 MOSS Services—Overview

7.7.3 Definition of Security Subtypes

UNIT-4

7.7.4 Application of MIME Object Security Services	343
7.7.5 Pretty Good Privacy (PGP)	346
7.8 Comparisons of Security Methods	349
7.9 MIME and Related Facilities for EDI over the Internet	349

Part 3 Internet and Web Site Establishment

Chapter 8 Internet Resources for Commerce

8.1 Introduction	359
8.1.1 Commercialization of the Internet	360
8.1.2 The Web Breakthrough	363
8.1.3 How to Connect to the Internet	367
8.1.4 Browsers	368
8.2 Technologies for Web Servers	371
8.2.1 HTML	371
8.2.2 Data Collection	375
8.2.3 Publishing Systems	376
8.3 Internet Tools Relevant to Commerce	382
8.3.1 Archie	382
8.3.2 File Transfer Protocol	383
8.3.3 Gopher	383
8.3.4 Telnet	383
8.3.5 Veronica	384
8.3.6 WAIS	384
8.3.7 Usenet Newsgroups	384
8.3.8 Other Internet Applications	385
8.4 Internet Applications for Commerce	387
8.4.1 Direct Selling	388
8.4.2 Selling Ad Space	388
8.4.3 Charging for Content	388
8.4.4 Charging for Services	388
8.5 Internet Charges	389
8.5.1 Browsing for Information	390
8.5.2 Browsing and Providing Information	393
8.5.3 Settlements	394
8.6 Internet Access and Architecture	395
8.6.1 Routing Arbiters (RAs)	396
8.6.2 Example of NAP Architecture	397
8.6.3 NAP Access	399
8.7 Searching the Internet	399
8.7.1 Gathering Information: Spiders and Search Engines	406
8.7.2 Actual Search Tools	411
