

SINGLY LINKED LIST

PROGRAM CODING:

```
#include<stdio.h>

#include<conio.h>

#include<alloc.h>

struct node

{

    int data;

    struct node *next;

}*start=NULL;

void create()

{

    char ch;

    do

    {

        struct node *new_node,*current;

        new_node=(struct node *)malloc(sizeof(struct node));

        printf("\n Enter the data:");

        scanf("%d",&new_node->data);

        new_node->next=NULL;

        if(start==NULL)

        { start=new_node;

            current=new_node;

        }

        else
```

```

    {
        current->next=new_node;

        current=new_node;
    }

    printf("\n Do you want to create another:");

    ch=getch();

} while(ch!='n');
}

void display()
{
    struct node *new_node;

    printf("The linked list:n");

    new_node=start;

    while(new_node!=NULL)

    {
        printf("%d--->",new_node->data);

        new_node=new_node->next;
    }

    printf("NULL");
}

void main()
{
    clrscr();

    create();

    display();

    getch();
}

```
